Will AI replace humans	**Probably not.**
Are we going to cooperate?	**Yes.**

"AI isn't here to replace us; it's here to enhance us. Together, humans and AI can achieve greater heights than either could alone."

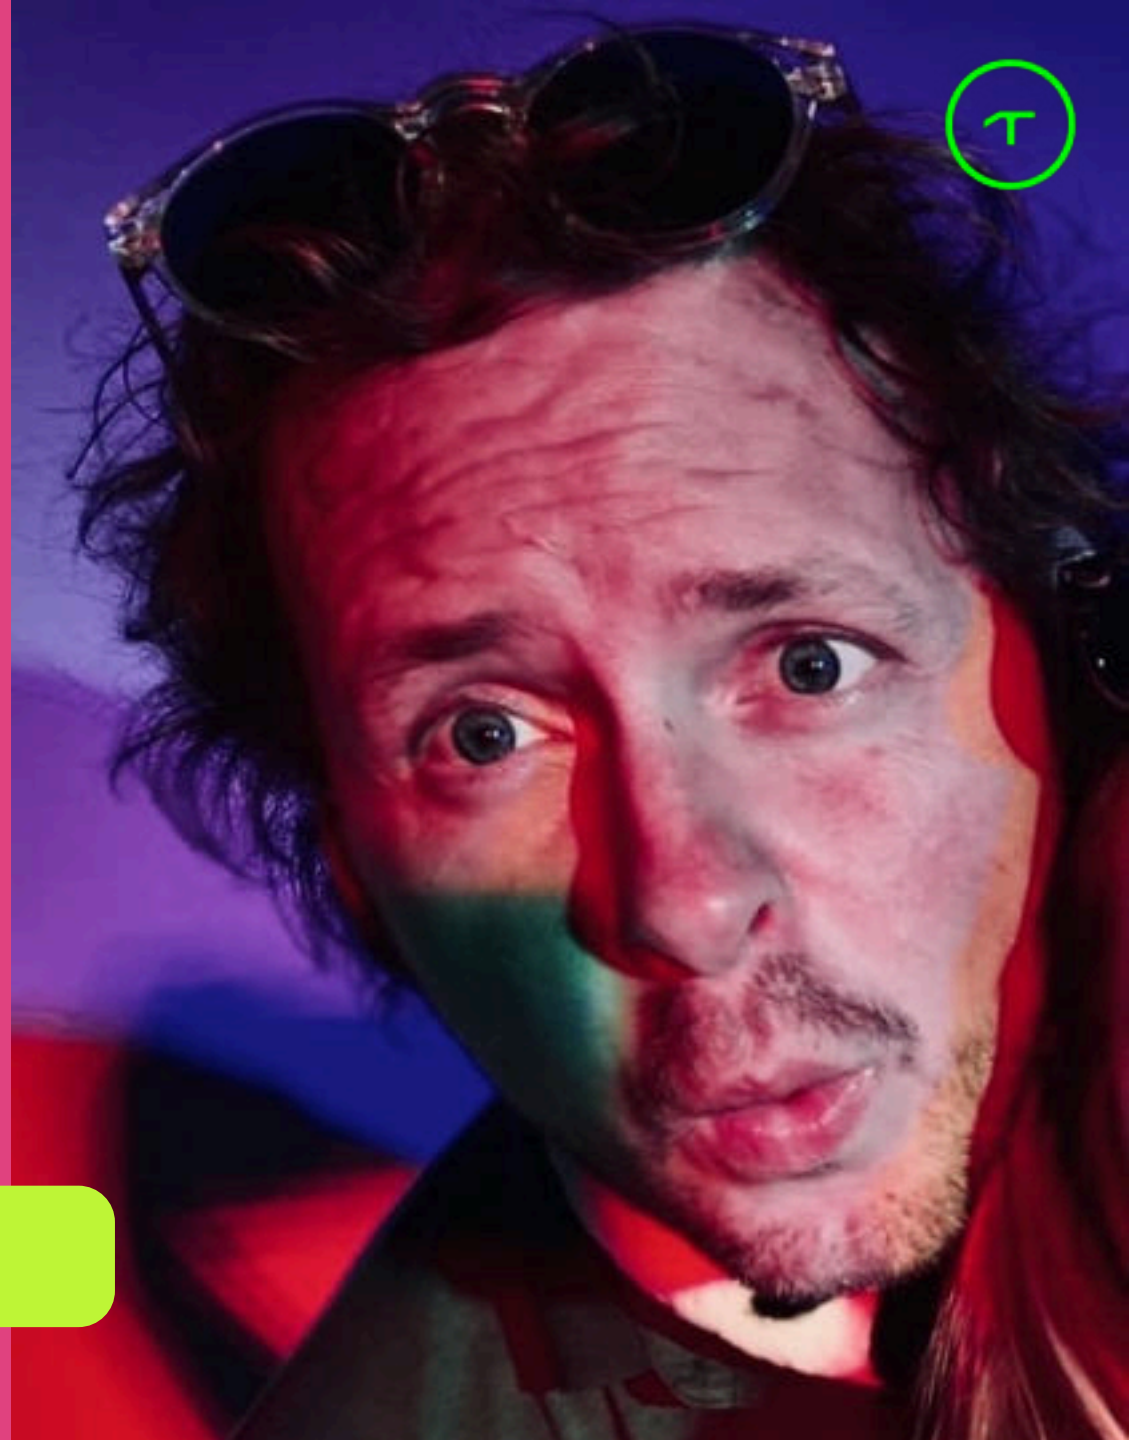
Helping clients to speed up processes with visualization.

Not generated with AI



What is AI?

Artificial intelligence is the science of making machines that can think like humans. It can do things that are considered "smart." AI technology can process large amounts of data in ways, unlike humans. The goal for AI is to be able to do things such as recognize patterns, make decisions, and judge like humans.

AI levels

(AI) is the simulation of human intelligence processes by machines, especially computer systems.

Task-Specific AI
Human-Level AI
Advanced or Hyperintelligent AI
AI-Driven Transformation

Not AI but advertised as it is

IBM Watson for Oncology
AI-Powered Trading Apps
AI created headlines for MSN news
Tesla's Autopilot Feature
Microsoft’s AI Chatbot Tay Turns Offensive

Poisoning AI data

People fighting back

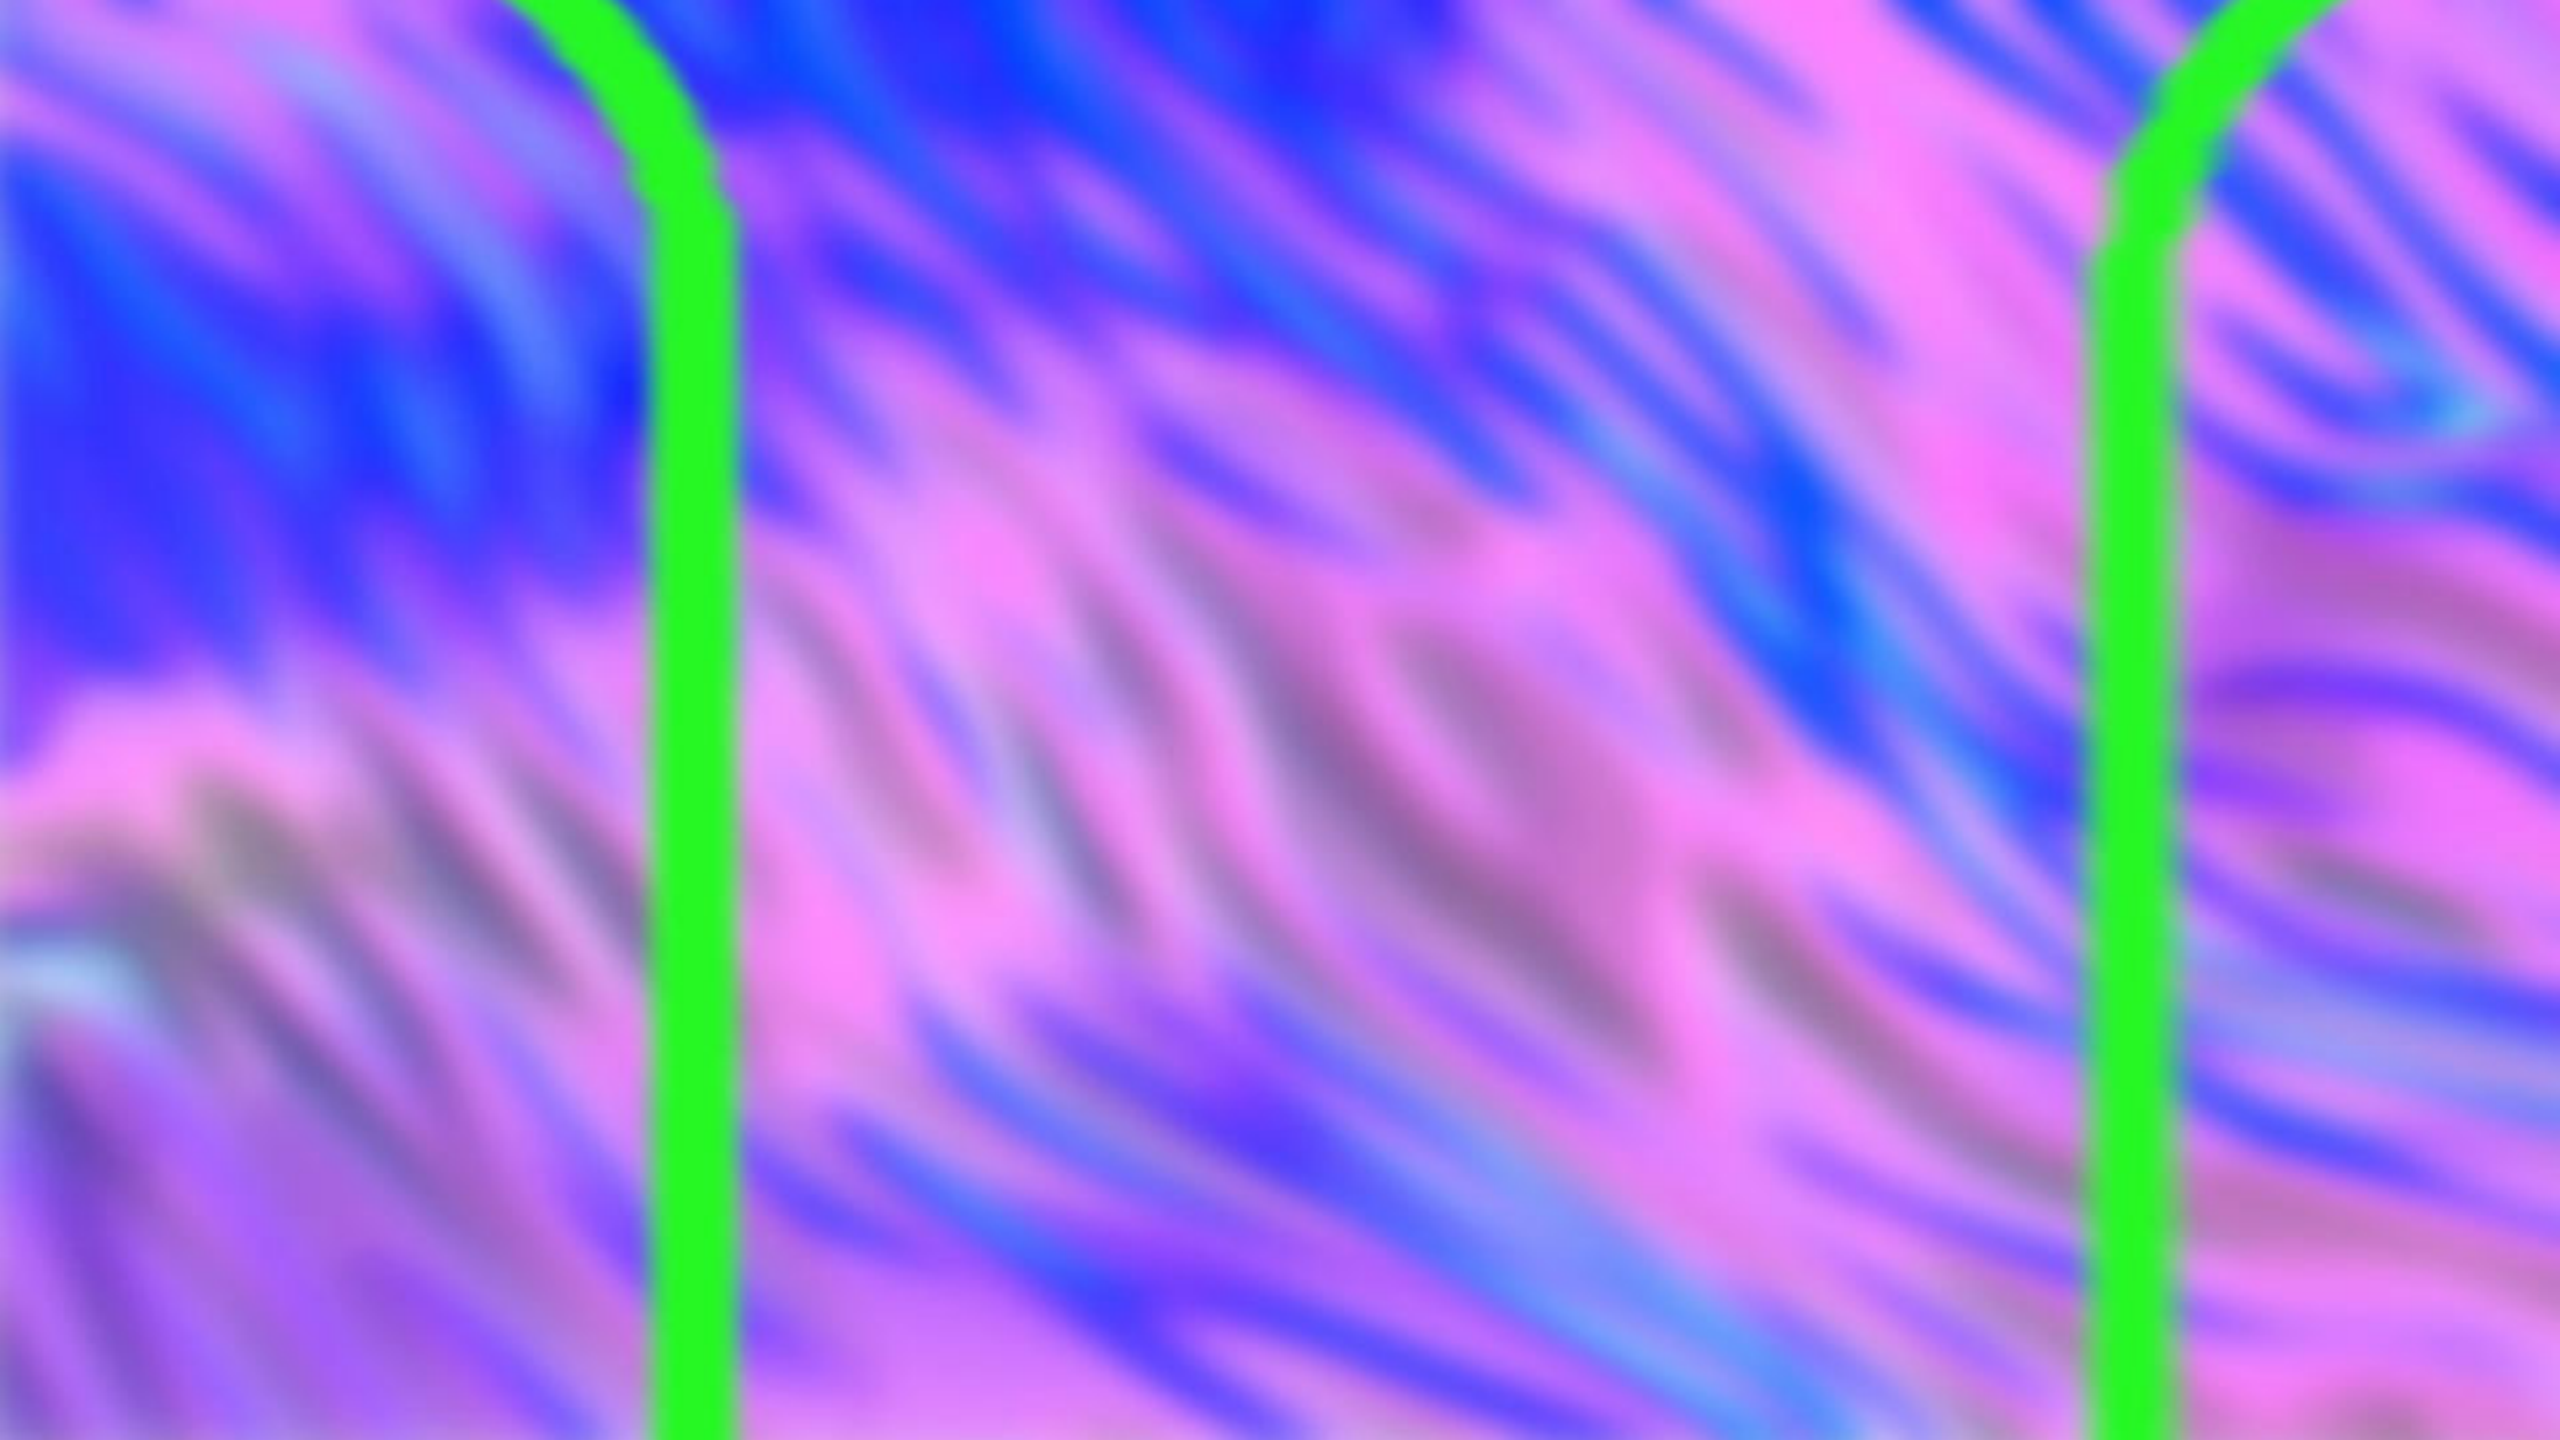
How countries around the world are trying to regulate AI

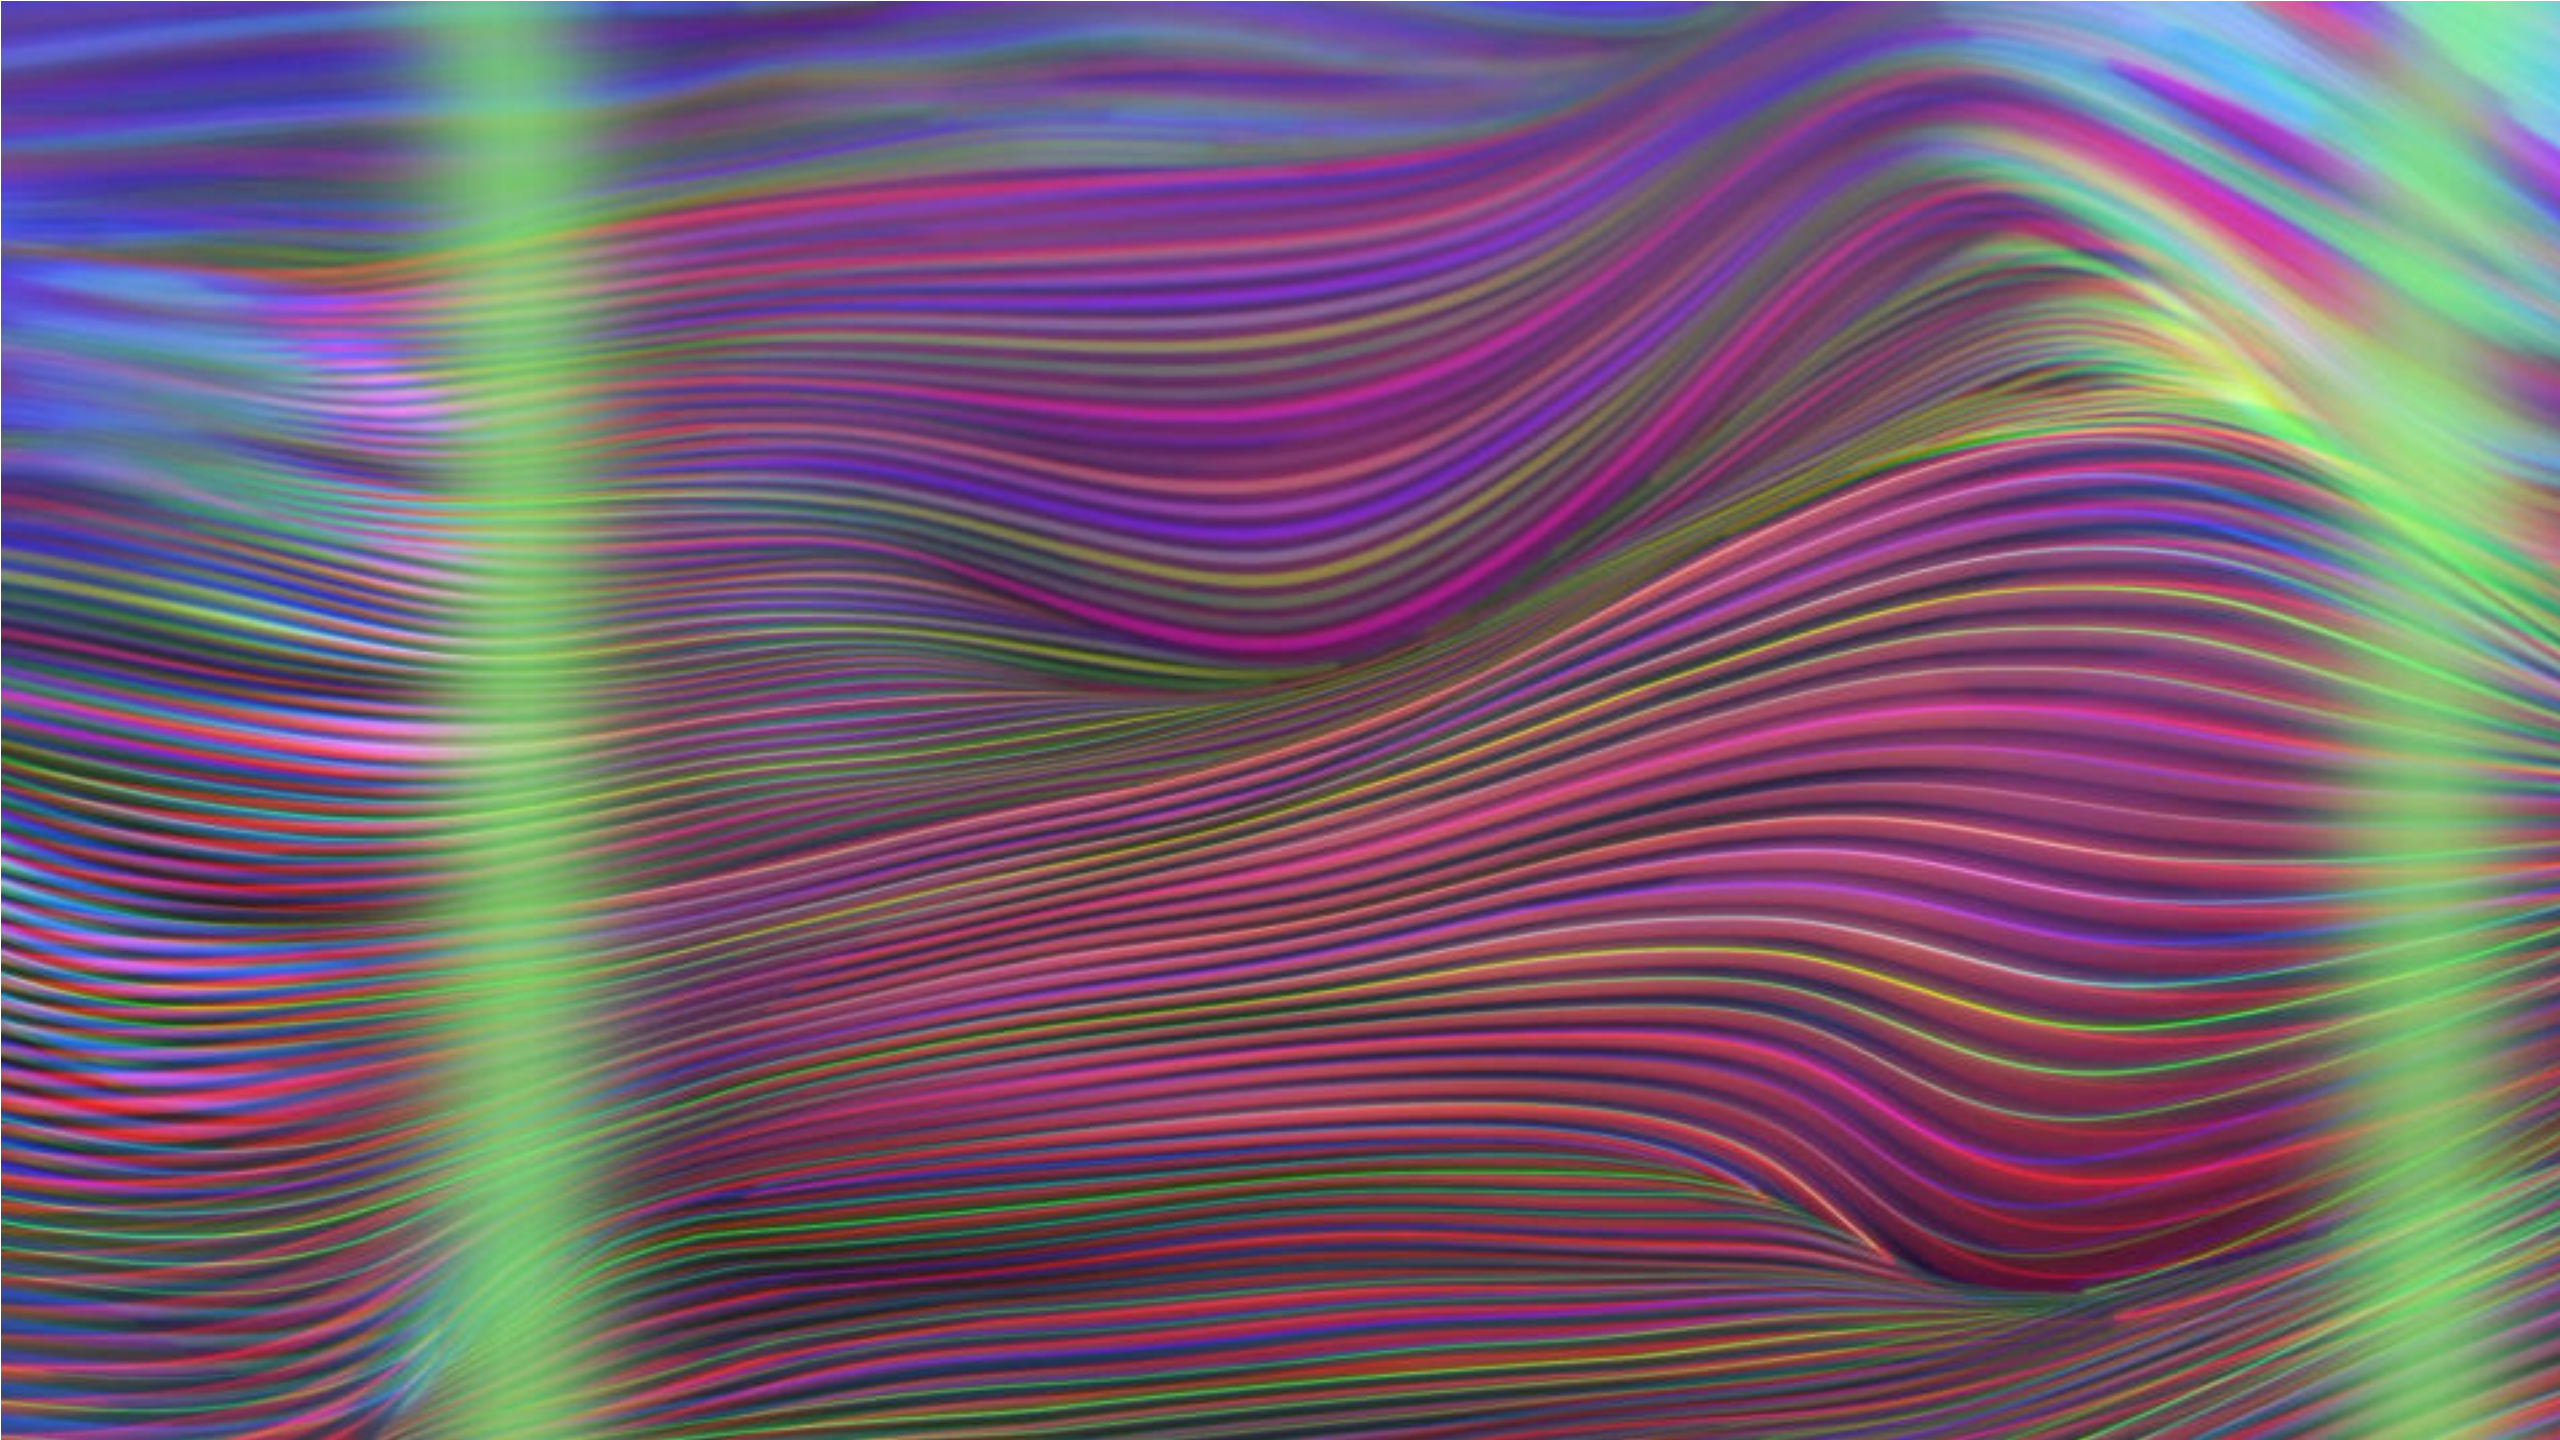
What can we do to prepare ourself for AI usage?

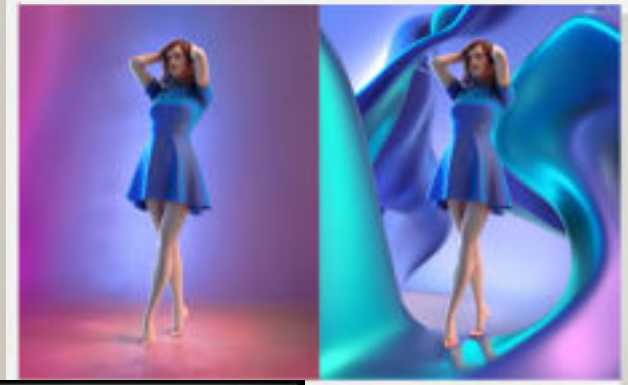
- Think about AI as collaborative Mind
- Learn fundamentals of AI
- Learn about new tools and update your processes
- Prepare yourself and improve learning solving skills
- Adaptability to technology
- Strong communication skills to learn communication with AI

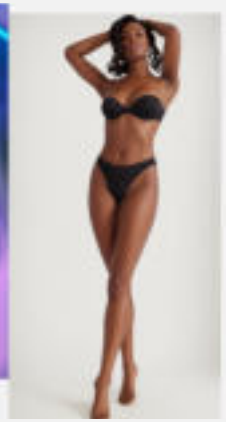
How we start with adaptation

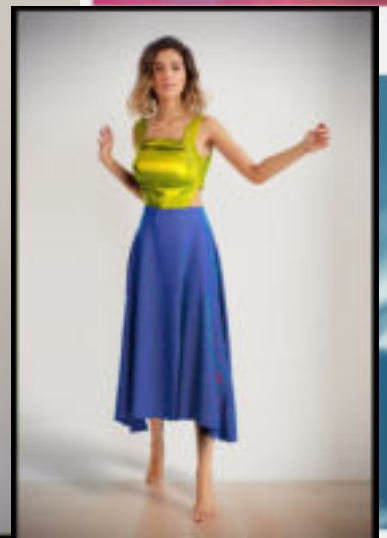
- Using of AI daily
- Find new solutions for everyday tasks
- Developing new tools for our customers and our production
- Setup AI accounts inside company and encourage people to use it.

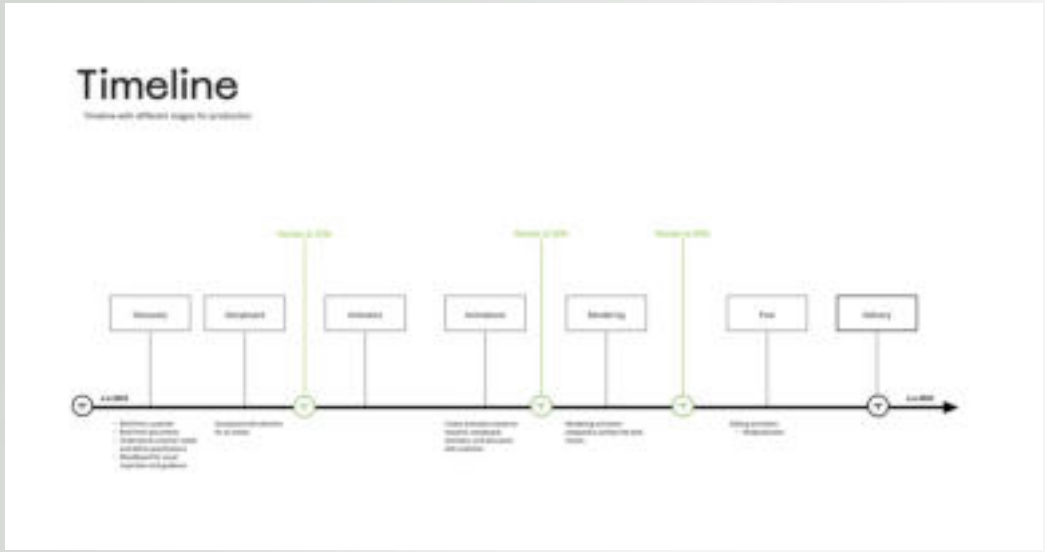


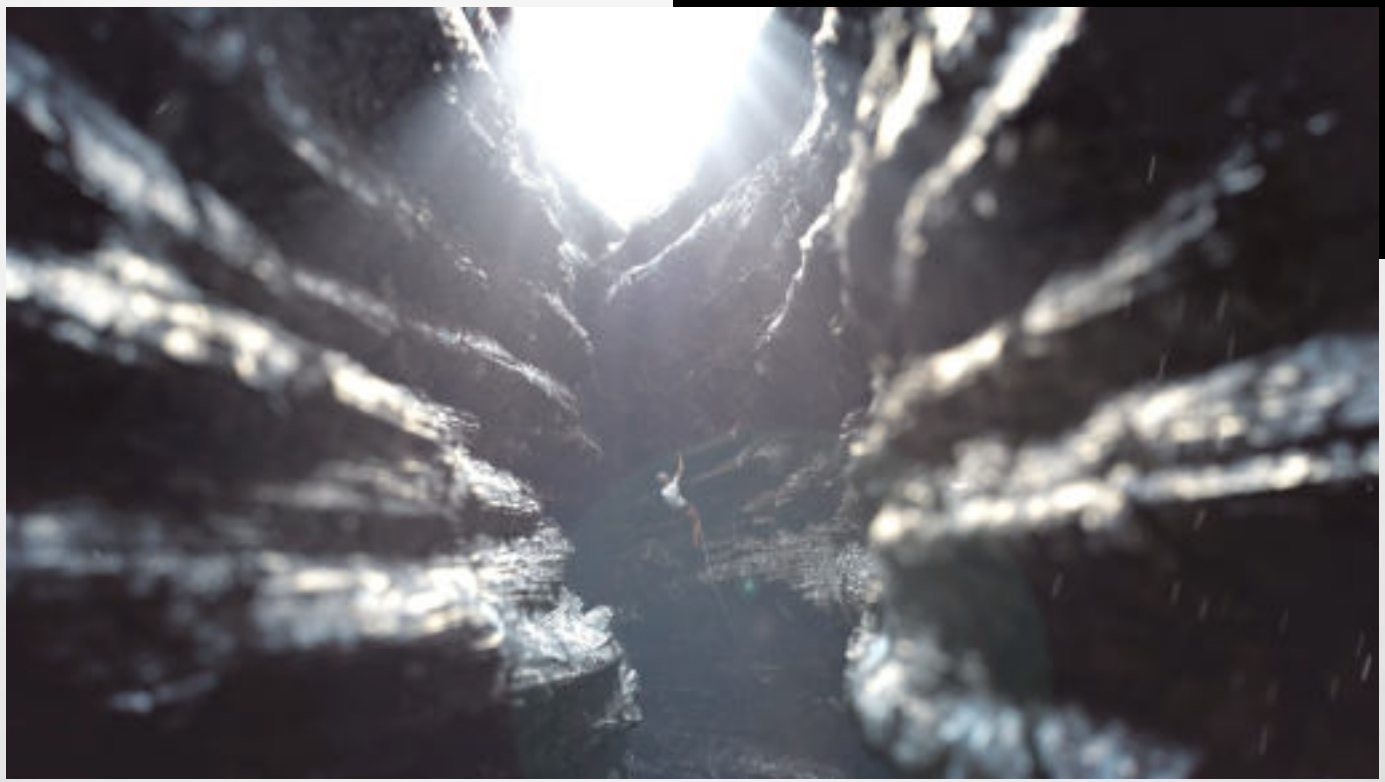












Product

Story Board Preparation

Description

Every animation project need a story board and good project management.
